

# Algebra Foundations: Basic Math, Introductory and Intermediate Algebra

The Bittinger Worktext Series recognizes that math hasn't changed, but students and the way they learn math have. The new Bittinger All in One, Developmental Mathematics: Basic Math, Introductory Algebra, & Intermediate Algebra, offers everything needed to teach the full developmental math sequence in one flexible course solution. It continues the Bittinger tradition of objective-based, guided learning, while integrating timely updates to proven pedagogy. It has a greater emphasis on guided learning and helping students get the most out of all of the resources available, including new mobile learning resources, whether in a traditional lecture, hybrid, lab-based, or online course.

**ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

**Access codes** Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. **Note:** You are purchasing a standalone product; MyMathLab does not come packaged with this content. MyMathLab is not a self-paced technology

and should only be purchased when required by an instructor.
