

## Aero A.32

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. The Aero A.32 was a biplane built in Czechoslovakia in the late 1920s for army co-operation duties including reconnaissance and tactical bombing. While the design took the Aero A.11 as its starting point (and was originally designated A.11J), the aircraft incorporated significant changes to make it suited for its new low-level role.
