

Project EARTH: A Metaphysical Primer

Project Earth by aja is an introduction a metaphysical, or New Thought, primer - that will be equally valuable to those whose curiosity has just been raised, whose growth has just begun and those who are long-term students of cosmic awareness seeking a reminder. Transcribed from channeled messages received by three women - this book is intended for those who may be just opening to possibilities beyond what they've been taught and what main stream society believes. But the whole other is too big, too mysterious, very confusing - and most don't know where to start. The language is simple and easy to understand. Compact, but with a broad scope, this book includes topics such as life and death, relationships, soul/body connection, using energy, etheric fields/auras, the power of love, psychic war, healing and free will. Except for the channel in this book assignment, Alena - the material was the primer to the authors, as well; and has served as a solid foundation for all further studies beyond the channeled project. In addition to being a great first step for a newly awakening reader, this material also makes an excellent gift for friends and family who don't want to hear it from such a close personal mouth; they prefer to hear it/read it from an objective third party source. As more of humanity awakens to the higher principles perhaps, there is a potential for less judgment of self and others, hate, discontent. Perhaps our society can evolve.
