

## Newnes Guide to Satellite TV: Installation, Reception and Repair

A broad-based guide to the installation of satellite TV systems which incorporates the skills of the TV/video technicians and the aerial riggers. It aims to act as a foundation course for all those interested in the practical side of the subject as well as being a reference source. The treatment is pitched at a level above a simple installation guide, but well below an involved theoretical textbook. The book is compiled in such a way that technicians, aerial riggers or DIY enthusiasts can study the practical side of the subject to a range of different levels or interests, to suit his/her requirements. Only a little elementary trigonometry and algebra are required.
